

Editorial

Journal of Surgical Academia has completed its two-year term with four issues published, to date. The journey over the last two years has been tough. Initially, there was scarcity of articles but the number of submission grew in number in successive months. The editorial team is grateful to all authors from within Malaysia and abroad who chose to publish in Journal of Surgical Academia.

The authors were duly rewarded with indexation in few databases. Journal of Surgical Academia stands tall with indexation in DOAJ, Open J-Gate, Journal Seek and Science Directory. It is targeted that the journal may have few more indexation in near future. The journal is serving as an excellent platform for all researchers to highlight the work in international arena. We also expect a similar response in future.

The editorial team expresses their gratitude and thanks to all readers and authors.
